

STARCONTROLS

YOUR GLOBAL IIOT, SCADA &
TELECOMMUNICATIONS PARTNER

WE DELIVER FULL SCADA **SOLUTIONS**

offering you end-to-end protection

As a customer, you'll benefit from our innovative approach by utilizing industry-tested and up-to-date products with hardware, software or networking components.

STAR CONTROLS

has partnered with the top vendors to include the best of breed products.

Products & Services:

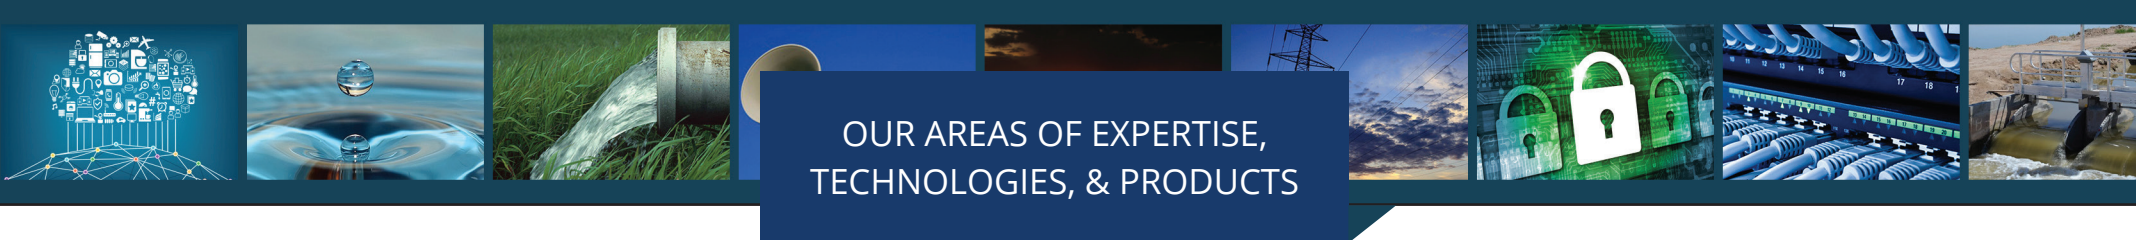

- SCADA Cyber Security
- Advisory & Training
- Support
- IIoT -Industrial Internet of Things
- RTUs & PLCs
- SCADA Software
- Communications & Networks
- Star Controls Signature Products & Solutions
- Cloud-Based & Managed Services

Star Controls is a leading provider of Industrial IoT (IIoT), SCADA and Communications systems for the Water and Electric Utilities, Oil & Gas, Public Safety, and other markets.

With a team of Subject Matter Experts in different areas and aspects, we have a holistic view of your operations, needs, and challenges.

Our skills, combined with our vast experience, allow us to offer different services, from trusted advisory to implementation, knowledge transfer, support and managed services.

OUR AREAS OF EXPERTISE, TECHNOLOGIES, & PRODUCTS

Star Controls' network experts developed a redundancy scheme that demonstrates High Availability of SCADA and IIoT systems for Mission Critical Applications or Sites.

Our services and product will fit exactly to your needs and budget. It can be as simple as monitoring your remote site all the way to full automation while utilizing very cost-effective technologies and products.

Our solutions are significant components in Non-Revenue Water (NRW), Smart City and Smart Grid.

Markets Served:

- Water
- Waste Water
- SCADA Cyber Security
- Oil & Gas
- Electricity
- Public Safety
- Regulatory Compliance & Environmental Monitoring
- Network Management

SCADA Software – support most of the common products, such as Trihedral and Wonderware. We can support the migration to new advanced SCADA.

Integration of SCADA with Enterprise and Engineering applications, such as GIS, CRM, Inventory Management, NRW and Analytics in different industries.

Field Devices – support a large variety of RTUs, PLCs, Smart Devices and Sensors.

Smart Remote Sites – integration of your smart devices in the remote sites to increase Efficiency, such as energy, flexibility, such as new technologies, and increase the autonomous of the remote sites.

SCADA Networks – support legacy networks, IP Networks, Cellular, and other technologies. Lead the migration from legacy to IP based networks, adding redundancy for mission-critical sites

Cyber Security for SCADA/ICS – assessment & protection

Industrial Internet of Things (IIoT) – leverage the flexibility and competitive technologies as a stand-alone or integrated into your existing SCADA and other applications

Training – for SCADA software, RTUs, PLCs, Networks, Cyber Security and Operations

Support – annual, tailored and on-demand

STAR CONTROLS

combines top-notch technical & operational skills with project management methods

KEY PROJECTS:

- Deerfield Beach, Florida – Water Utility
- Orange County, Florida – Water Utility
- City of Orlando, Florida – Water Utility
- West Palm Beach, Florida – Water Utility
- Martin County, Florida – Water Utility
- City of Orlando, Florida – Water Utility
- St. Johns County, Florida – Water Utility
- Pinellas County, Florida – Water Utility
- Mount Pleasant Waterworks, South Carolina – Water Utility
- Honolulu Board of Water, Hawaii – Water Utility
- St. Johns River Water Management District, Florida – Water Management Agency
- South Florida Water Management District, Florida – Water Management Agency
- Jamaica National Water Corporation – Water Utility, with integration to NRW
- Bahamas Water & Sewerage Corporation – Water Utility with integration to NRW
- Detroit Edison, Michigan – Electric Utility
- Grenada Electric, Grenada – Electric Utility
- Petrobras, Brazil – Oil & Gas Offshore Platforms
- NYPD/NYCT, NYC, New York – Network Fault Management
- Palm Beach School District – Public Safety; School Monitoring
