Remote Access Management - The Challenges

Challenges of Remote Access Management for Utilities Energy, and Telecom:

- Overwhelming Requests: Flood of requests for facility neutralization, arming, entry permits, and authorizations.

- Poor Follow-up: Lack of documentation and follow-up for employee and contractor entries and exits.

- Slow Permission Management: Limited ability to swiftly grant or revoke permissions.

- High Operating Costs: Costly operations due to inefficiencies.

- Emergency Response Gap: Lack of immediate solutions in emergencies.

- Time Wastage: Inefficient direction leading to wasted time across facilities.

MekLock

Introducing MekLock: Streamlining Operations with Ease:

- Remote Access Control: Manage remote site access effortlessly.

- Facility Control: Disarm and arm facilities remotely for enhanced security.

- Contractor Monitoring: Monitor contractor entry into facilities for better oversight.

- Automatic Lock Management: Seamlessly lock and unlock facility access points.

- Permission Management: Grant and revoke remote permissions swiftly.

- Control Room Efficiency: Reduce workload and calls in control rooms with streamlined processes.

- Cost Savings: Significant cost savings through optimized operations.

- App Integration: Access reports, maps, and status updates conveniently via the app.

- Emergency Response: Instant SOS button for quick emergency response.

Thank You!
